Industrial maintenance services

INDUSTRIAL MAINTENANCE AND SERVICING

WE OFFER A WIDE RANGE OF MECHANICAL MAINTENANCE SERVICES TO THE paper and chemical industries, power plants and the public sector with years of experience.

PUMP MAINTENANCE

WE PERFORM REPAIR, MAINTENANCE AND INSTALLATION SERVICES on all types of industrial pumps and have years of experience working with the paper and chemical industries, power plants and the public sector.

- water supply/treatment plant submersible pumps
- screw pumps
- centrifugal pumps
- various mixers
- turbines
- electric motors

We have S2 level electrical qualification and our own highly skilled electricians.

ANNUAL MAINTENANCE DOWNTIME

WE OFFER OUR SERVICES DURING BOTH UNEXPECTED DOWNTIME SITUATIONS and annual maintenance downtime in the paper and chemical industries as well as at power plants.

To guarantee the quality and success of annual maintenance work we start planning in cooperation with the customer well before the downtime period, which also helps minimize the risk of accidents.

EQUIPMENT

Our company, located in Eura, has about 2,400 m² of modern workshop space in three halls.

- 3 lathes
- Universal milling machines
- Press brakes 200 ton / 3 m
- Guillotine shears s= 10 mm
- Rolling machines s= 20 mm / 2.5 m
- 2 safety valve pressure testing benches
- Valve grinding machines
- Lifting equipment
- Refrigerated containers
- About 30 maintenance trucks

WE HAVE AN EXTENSIVE NETWORK OF OTHER PROFESSIONALS WE CAN CONTACT.

Through this network we can help our customer with spare part purchases, machining and design work. We also service gearboxes and other transmission equipment.

VALVE MAINTENANCE

WE REPAIR AND SERVICE control, shut-off, safety and other valves reliably and based on our professional skills and long experience - either on-site or in our workshop.

We have mobile pressure testing equipment intended for safety valves. This equipment can also be used to test other valves. For safety valve pressure testing, we have a PC program that visualizes the valve's opening and closing pressure as a graph for the customer. Whenever necessary, we check safety valve set pressures under the supervision of INSPECTA OY.

We repair valve actuators and have valve grinding machines and a wedge gate for poppet valves and cone seat valves.

SHIP BUILDING

WE ALSO HAVE THE SKILLS required for dealing with rust and acid resistant sheet metal work - as well as pipe products and furniture installation.

The professional skills of our experienced technicians have been put to use on ships and shipyards around the globe.

MACHINE SHOP WORK AND INDUSTRIAL PIPELINES

WE HAVE 2,400 M² OF WORKSHOP SPACE in three halls with hoists running through them. Our newest hall has a working height of up to 8 meters.

We apply our long experience in this field to industrial metal structures, service platforms, power plant coal mill repairs, conveyor spare parts, blower frames, industrial pipeline prefabrication and the manufacture of various types of containers and spare parts. We have also delivered sampling devices for water quality monitoring in industrial power plants.

It is also possible to arrange design and painting services for metal structures.

REFRIGERATION AND ELECTRICAL EQUIPMENT INSTALLATIONS

WE ARE A CLASS Y3 REFRIGERATION COMPANY REGISTERED BY THE FINNISH SAFETY AND CHEMICALS AGENCY (Tukes) and we have S2 level qualification for electrical work.

We can provide you with complete solutions for all refrigeration-related applications. We install and service equipment from industrial kitchens to large industrial water coolers.

OUR CUSTOMERS INCLUDE LARGE AND MEDIUM-SIZED INDUSTRIAL FACILITIES,
THE ENERGY INDUSTRY AND THE PUBLIC SECTOR.

OPERATIONS

Euran Teollisuushuolto Oy was founded in 2006 and provides industrial installations, maintenance and servicing.

Combined, the founders have decades' worth of experience in this field, which guarantees a reliable, high-quality end result.

QUALITY

As ETH has grown, the company's quality system has grown with it, based on tried and tested practices.

Our goal is that our quality system would help our customers see the organized and quality-oriented nature of our operations.

In addition to ISO 9001:2008 our steel work is guided by the EN-1090 product certification.

OCCUPATIONAL SAFETY

The continuous improvement of workplace safety is a priority for us, and our goal is zero accidents.
